

Internship Guidelines

Faculty of Engineering & Technology

PURPOSES & BACKGROUND

Internship is a field-work study done by a student in a company that has agreed to accept the student for a certain period of time.

Purposes of internship:

1. Expose the student to a real working experience within a work environment that involves real situations, issues, and challenges as an employee.
2. Allow the student to apply what he/she has learned in classrooms into real work situations, that will make his/her studies more meaningful and provide him/her with useful tools for his/her career.
3. The student will learn to identify and analyze practical issues and challenges in a real work environment, and will be able to find solutions for certain issues and challenges.
4. Provides opportunities to broaden the student's network of contacts that might possibly lead to permanent job assignment by the company.
5. The student will write a comprehensive internship report and present it to his/her faculty supervisor and other faculty members. Internship program is an excellent way to give back to the community as a part of the company's community development.
6. Internship program allows the company to take advantage of a short-term support. The intern can help company's employees be more productive, prevent them from becoming overburdened with side projects, as well as free them to accomplish more creative tasks, or those where higher-level, strategic thinking and expertise are required.
7. Internship program is one of the more effective recruiting tools. During the internship period, the company will be able to observe whether the intern is a potential candidate for permanent employment.

INTERNSHIP PERIOD

The period of internship will be for the full-time equivalent of 160 hours (eight 20-hour weeks). Unless the company suggested other length of time that does not conflict with the student's academic progress.

SCOPE OF WORK

The scope of work for a student during intern period is for administrative support, whether functional or operational, including analysis activities based on Design, Engineering or Technology study program. This scope of work also includes making a comprehensive Internship Report.

REQUIREMENT TO CONDUCT INTERNSHIP

1. Completion of a minimum 100 credits with a non – negotiable minimum GPA of 2.50, in which grade D constitutes no more than 20% of all completed credits;
2. Proof as an FET active student;
3. Completion of internship registration in FET

SCHOOL'S RESPONSIBILITIES

Sampoerna University Faculty of Engineering & Technology will:

1. Support the student by providing a reference letter ;
2. Provide Internship Evaluation Form for the student to bring to the company and to submit to his/her internship supervisor and to Sampoerna University Faculty of Engineering & Technology.
At the end of the internship period, the student will be given a score after he/she submits a report and gives a presentation about the internship.
3. Provide template of Internship Completion Form for the student to bring to his/her internship supervisor; and
4. At the end of the internship period, the company's supervisor needs to give a reference letter as a proof that the student has completed the internship and fill out the Internship Evaluation Form based on the performance factors.

COMPANY'S RESPONSIBILITIES

Upon company's approval to accept the student from Sampoerna University Faculty of Engineering & Technology as an intern, we will need the company to:

1. Fill out and sign the Internship Evaluation Form at the end of the internship period based on the student's performance;
2. The company may give incentive to the intern based on the company's regulation and this is between the student and the company;
3. Appoint 1 (one) supervisor from the company who will supervise and monitor the intern's activities and performance during working hours;
4. Provide an Internship Completion Form (Surat Keterangan Telah Melakukan Internship) at the end of the internship period; and
5. Provide a feedback to Sampoerna University Faculty of Engineering & Technology that addresses the competencies of the student regarding areas of shortcoming and potential improvements.

STUDENT'S RESPONSIBILITIES

During internship period, the student will:

1. Abide by the company's rules and regulations;
2. Invite 1 (one) lecturer from the university who will monitor the student's internship report and be the student's internship supervisor;
3. Fill the form from faculty to appoint one internship supervisor and send the form back to the faculty once an approval from the company is obtained;
4. Uphold the reputation of the company and the school and conduct him/her-self in a professional manner with integrity and high ethical standards;
5. Directly report to the internship supervisor and internship supervisor;

6. Maintain daily activity journals containing tasks assigned and accomplished for the day; and
7. Submit a comprehensive Internship Report and make an oral presentation to the university.

At the end of the internship period, the student has to:

1. Submit a written report and do an oral presentation on campus within two weeks to one month after internship period;
2. Submit the report to the Faculty of Engineering & Technology and wait for the schedule to give a presentation about his/her internship to the Faculty of Engineering & Technology;

Internship Supervisor Form

This is to certify that the following faculty member:

Name :

Position/Study Program :

Has agreed to be the Internship Supervisor for the following student:

Name :

Student ID # :

Student,

Supervisor,
SAMPOERNA UNIVERSITY
FACULTY OF ENGINEERING AND TECHNOLOGY

Internship Report

[Name]

[Student ID]

[Study Program]

Faculty of Engineering and Technology

Sampoerna University

[Year]

Chapter 1. INTRODUCTION

[Background, Objectives, Benefits, Scope of work]

Chapter 2. COMPANY PROFILE

[Including type of business, company vision and mission, company history, organizational structure, and other related information]

Chapter 3. INTERNSHIP ACTIVITY

[This chapter explains the details of a student's daily activities when carrying out internship. *Refer to the task list form during Internship period*]

Chapter 4. ANALYSIS AND INTEPRETATION

This section contains descriptions of:

- Understanding / insight gained from each activity (activities, understanding / insight gained, benefits, advantages, disadvantages, recommendation) which is the insight of the implementation of internship
- Analysis and interpretation of all activities compared to the theory obtained during lectures
- Suggestions for improvements that can be given

Chapter 5. [PROJECT]

This chapter accommodates assignments given by the company, if any. Title of Chapter 5 will be based on the assignments given by the company

Chapter 6. CONCLUSION(S)
